Wolverines meeting 2/1/2010

The meeting was held at the Mt. Clemens Public Library.

There were 11 present, and donuts and coffee were thoughtfully provided by Glen Meller

Jerry opened the meeting at 7:07 p.m.

The last meeting was held in December, but the Secretary failed to procure the minutes.

But the major item was the approval of a new fence, budgeted at \$450.00

Treasurer's Report:

Last month we had \$578.82

This month we have \$995.82

Also 5 members paid their dues today.

The Secretary brought in a bill for the web page, hosting and registration totals \$56

We need \$1471 to operate through 2010, so we are ready for the year.

Secretary's Report:

This was not available this month.

New Business:

Meeting at Larson Middle school:

Jerry attended this event, it was displayed in our "Events" section of our web page. He had great things to say about this meeting, such as the large 4 engine cargo plane, and the great explanation of 2.4 giga-Hertz radios too.

Jerry cautioned that it is easy to miss the step at Larson Middle School, where you exit the meeting, and if you did it could possibly hurt real bad. We didn't drill Jerry any more about this, but it looked like he had some aches and pains...

Flying at "The Dome"

Much discussion was centered around flying at this indoor site, just South of the Silver Dome. There are many things you should know before you fly, as there are a lot of participants there, and you don't want to cause problems. This is open from 11 am to 1 pm Tuesdays.

Bill Welser's GrandDaughter's trip

There was a \$5 dinner given as a fundraiser for this trip to Europe, and a vote was taken for a \$100 donation to the cause. The vote passed, and \$50 of this was immediately produced by 5 of the members, so there won't be much coming from our treasury. Thanks to Dave Lockhart, Jerry LeLacheur, Glen Meller, Les Brown, and D. Bacon for this.

New Business, cont'd:

Les Brown's Charcoal Grille

Les has a grille that is in excellent condition, and will be donating it to the club. We thank him for this, and with all this cooking we are thankful that our planes don't have to lift us too.

Electricity at the field

Glen brought up the idea of having electricity at the field, which would even allow putting in a well for water. Glen said a recent AMA magazine, Nov or Dec, showed how to do it with a solar panel kit for about \$400.

The Owner Appreciates Us

We got a nice Christmas card from Virginia, thanking us for keeping the place clean.

50/50:

The 50/50 totaled \$32, and \$16 was won by Mike D.

Next Meeting: Mar 1, 2009, Monday

Steve M. will supply the coffee, Dave B. will bring the donuts, so come join us!
